KEY

- TR Treatment/remediation equipment or packaged plants for treating contaminated groundwater
- WE Well and extraction pumps; and/or high volume pumps for groundwater flow control systems
- IM Instruments to measure/monitor groundwater contamination
- WW Well and water samplers or kits to extract/transport samples for subsequent analysis
- WD Well-drilling, excavation, barrier construction, liner or geotextile installation services for groundwater flow control or remediation
- SU Surveys: geological assessments; civil engineering services related to groundwater flow control and/or remediation services
- PP Pumps, Pipes and Necessary Fittings
- GD Gas Detection
